

The Therapeutic Toolbox for Brain Injuries

NeuroBalance Center is pleased to welcome
Deborah Giesler, MS, CCC/SLP, Executive
Director of Synapse House, for our August
Lunch & Learn!

Deborah has been a Speech Pathologist working with individuals affected by traumatic brain injury and other acquired brain injuries, such as stroke and brain tumors, for 33 years. In addition to her role as a Speech Pathologist, she has founded two non-profit organizations to support people with brain injuries. She will discuss brain injury recovery, the "Therapeutic Toolbox"—how "work" can be healing—and the importance of exercise and therapy in promoting cognitive improvement after an acquired brain injury.
